## Address

Kang Ching Rd Blk 333

# 08-264

Singapore, 610333

|                                       |  |
|---------------------------------------|--|
| <b>Objective</b>                      | A position in backend development or data analysis.  |
| <b>Background</b>                     | During high school and while in the army, I pursued my interest in programming by taking online courses as well as working on my own software projects. I've also studied mathematics intensely while in the army.   |
| <b>Education</b>                      | <b>Beijing BISS International School</b> – Beijing, China. <ul style="list-style-type: none"><li>• International Baccalaureate (41/45 points).</li><li>• Higher Level Subjects: Math 6/7, Physics 7/7, Chemistry 7/7.</li><li>• Math Extended Essay (A).</li></ul>   |
| <b>Employment</b>                     | <b>Army</b> – Singapore Armed Forces, 02/2015 to 02/2017. (National Service)   |
| <b>Technology</b>                     | (good level) python, numpy; (basic level) Mathematica, C, Java, HTML, CSS, $\text{\LaTeX}$ ; (learning) Haskell.   |
| <b>Projects</b>                       | <b>crunch-shake</b> – A python library that evaluates scripts on the Bechdel Test and other similar metrics. Source Code : <a href="https://github.com/zhiyanfoo/crunch-shake/">https://github.com/zhiyanfoo/crunch-shake/</a> .   |
| <b>Additional Relevant Coursework</b> | <b>Learning From Data</b> – <i>Caltech telecourse</i> . <ul style="list-style-type: none"><li>• Introductory Machine Learning course focused on mathematical rigor. Machine learning algorithms like Perceptron with Stochastic Gradient Descent, hard-margin Support Vector Machines and Logistic Regression built from scratch.</li><li>• Source Code : <a href="https://github.com/zhiyanfoo/caltech-machine-learning/">https://github.com/zhiyanfoo/caltech-machine-learning/</a></li></ul> <b>Real Analysis, Convexity and Optimization</b> – <i>Harvard Extension School</i> . <ul style="list-style-type: none"><li>• Upper-division pure math course focused on optimization problems with convex sets, normed infinite-dimensional vector spaces, and convex functionals.</li></ul> <b>AP Computer Science A</b> – <i>American Advancement Placement Exam</i> . <ul style="list-style-type: none"><li>• Score (5/5). Main topics included were sorting algorithms and object-oriented programming.</li></ul> <b>Algorithms on Strings</b> – <i>Coursera, University of San Diego</i> . <ul style="list-style-type: none"><li>• String compression and search algorithms e.g. Suffix Trees, Burrows-Wheeler Transform and Knuth-Morris-Pratt.</li></ul> <p>Complete list of coursework done can be found at <a href="https://zhiyanfoo.github.io/learning/">https://zhiyanfoo.github.io/learning/</a>.</p> |
| <b>Mathematics</b>                    | Linear Algebra, Multivariable Calculus, Differential Equations, Stochastic Systems, Real Analysis.   |
